RG104 E-1 Box 143 Dec 1886

I enclose a print in wax of the edge of the Coin

1886

Burlington Iowa 12/27

To The Director of The U.S. Mint, Philadelphia

Dear Sir. I have a Silver dollar of 1878. (I think from the Philadelphia mint) which has Only half of the edge Milled. It is undoubtedly genuine. Will you tell me if the Coin is unique in that respect, or is it of more or less frequent occurrence. And how would it be possible for the Coin to escape a part of the operation of milling & also escape detection afterwards. A reply will greatly oblige.

Yours Respectfully. F. J. Mansfield D.D.S.
